CANADA FIRST TO ENTER CHICAGO GRAIN SHOW

Canada has the honor of making the first entry in the competitive classes of the International Grain and Hay Show which will be held at Chicago December 1 to 8, according to Secretary-Manager B. H. Heide of the International Live Stock Exposition, of which the grain show is a leading department. James A. Paur, Langham, Saskatchewan, sent in the first entries of the year. He will exhibit samples of rye and Marquis wheat with which he has been very successful in the past.

The winnings of Canadian farmers at the big Chicago show have resulted in bringing the agricultural possibilities of the Dominion to the attention of the entire world, and efforts are being made this year to send an even stronger display of grains to the International than in former years.

Noxious Weeds Prosecution

On Friday last, James Frost, a farmer in the Harmattan district, was convicted before J. P. Phillips, Didsbury, for failing to comply with the orders of Peter G. Johnston, Weed Inspector for the Municipal District of Westerdale, to destroy a large growth of Canada thistle on his farm. He was fined \$20.00 and costs.

Entries may be made without charge but must be in the hands of Manager B. H. Heide, Union Stock Yards, Chicago, by November 10th. A large number of special awards in addition to the exposition premiums are offered to the Canadian exhibitors by the provincial governments, railroads and other Canadian business interests. A copy of the prize list can be seen at the Pioneer office.

Two Meetings Sport Enthusiasts Called

A meeting will be held in the C.P.R. station, Friday, Sept. 28th, at 8 p.m. sharp, to wind up the 1928 baseball business. Everybody welcome.

Monday evening, October 1st, a hockey and skating meeting will be held in the C.P.R. depot to discuss plans for the following winter. Some may think it a little early to talk hockey yet, but it is never too soon, but it can be too late. There are a good many matters to be discussed at this meet so be sure you are among those present.

BIRTHS

At the Didsbury General Hospital:

To Mr. and Mrs. Carlyle Koester, September 3, 1928, a son.

To Mr. and Mrs. Henry Leahy, September 5, 1928, a son.

To Mr. and Mrs. Waller Otto, September 6, 1928, a son.

To Mr. and Mrs. D. C. Archer, September 5, 1928, a son.

To Mr. and Mrs. Joseph Ficht, (nee Marion Gibbs) September 8, 1928, a daughter.

To Mr. and Mrs. Erling Erickson, September 16, 1928, a son.

AN OPEN LETTER TO THE PEOPLE OF ALBERTA

Since the inauguration of the Peace Time Programme of the Canadian Red Cross, the Alberta Division has spent hundreds of thousands of dollars within the province. This money has been spent in relief work, out-post hospitals, home nursing classes, immigration work, Junior Red Cross in the schools, general health education work, and in connection with the Crippled Children's work, on which work alone \$160,000 has been spent.

A large part of the money spent a quarter of a million in fact, has been given to us in annual grants by the National Office in Toronto, who believe the work the Alberta Division was doing was worthy of that support. The funds at National office however, have become depleted, and this year our grant was cut by \$15,000 and next year we will have to be self-supporting.

This situation leaves the question of the continuance of Red Cross services in Alberta squarely up to the people of the province. We need \$65,000 yearly to carry on our work. Over \$50,000 of that sum must be raised by voluntary contribution. Unless, therefore, you rally to the support of Red Cross and by each doing his or her share, enable us to raise this amount, Red Cross must discontinue the services it has been giving.

This means stopping our immigration and health work, reducing our outpost hospital work, and, worst of all, curtailing our crippled children's work. Are you willing this should happen?

As President of the Alberta Division I feel that Red Cross services are too valuable to lose and I believe that when the people of this province really realize that Red Cross must have greater support or it ceases operation, there will be no question of their answer.

There will be a provincial wide campaign starting at once. I appeal to all to do their share. Give at least \$1.00 and become a member; give more if you can. If you would rather you can give a grain donation, as all elevator agents will issue cash or storage tickets in the name of the Society and forward them to us for you. Do what you can to assist those in charge in your district and give your membership or donation to them or if you prefer, send your membership or donation direct to 407 Civic Block, Edmonton.

The main thing is give your support in every possible way. Don't let Red Cross fail!

Yours faithfully—W. Egbert, Lieut. Governor and President Alberta Division, Red Cross Society.

An Inspiring Sight

The prairies of Western Canada during this year of grace, 1928, have been a joy to behold. In the early summer following the June rains the tender verdant green of the recently sown grain crops presented a restful picture full of promise for the future. As week followed week of almost ideal growing weather, with only an occasional storm affecting restricted areas, and an absence of rust and insect pests, the early promise of a bountiful crop grew steadily into a certainty.

Inspiring as the prairies were in early spring and the first days of summer, and full of promise as they were, as the crops became taller and the heads began to develop and fill out as they swayed to the passing breeze, it is in the late summer and early fall months that the West really comes into its own and presents a picture which few places in the world can rival and none surpass.

This article is written in mid-September when days of unsurpassed sunshine prevail, each day closing with a glorious sunset, the promise of still another day of perfect harvest weather to follow. The writer has just completed a motor trip through hundreds of miles of grain fields. And what a sight! If the pessimists of our Dominion could make such a trip surely their croaking voices would be silenced.

Speeding along almost perfect roads, albeit only well graded dirt roads, whether over prairie as level as a billiard table, or with the feeling of a bird rising and dipping as the car speeds over more rolling country, dropping into a valley here and winding up through the hills, only one sight reaches the eye, and that panorama extends unchanged as far as the eye can reach—a seemingly limitless expanse of yellow golden grain. The whole country is golden yellow.

And no great industrial city in the world can show a scene of greater activity. On all sides can be heard the click and clatter of the binders as they cut down the ripened grain and with automatic carelessness toss the bound sheaves to one side, ready for the stookers. With amazing frequency the sight is witnessed of the newer combines—reaper and thresher—some using the swather attachment, others threshing the grain as the big machines move onward with the irresistibility of a tank in modern warfare. In some fields the harvest hands are busy in groups gathering the sheaves into stooks; across the road a threshing gang is at work, horses hauling great racks or stook-loading machines, pitchers, engineers, firemen, drivers, all covered with dust and working at high pressure to accomplish a maximum of work before daylight falls.

And as one speeds along the road it becomes a necessity to slow down and turn out every few minutes as we pass, or allow to pass, a box wagon or motor truck loaded to capacity with the wheat being hurried to the elevators, those far from artistic but essentially modern and practical adjuncts to twentieth century grain raising and marketing. Every road is alive with them, great wagons drawn by teams, double teams, horses three abreast, countless new motor trucks, strings of wagons hauled by a tractor, driven by old men and young, boys hardly in their teens, women and girls, all headed to the nearest railway station.

And these small prairie towns and villages through which we pass every eight or ten miles all present the same scene of tireless activity. The loaded grain wagons and trucks are lined up awaiting their turn to reach the elevators, while the "putt, putt" of the engines testify to the energy with which the elevator operator is striving to keep up with the golden stream pouring in upon him. At the same time is heard the "hiss" of the grain as it is emptied through the elevator chutes into the waiting freight cars. All night long the elevators struggle with the gigantic task before them and through the night the long trains plunge through the darkness hurrying the proceeds of the farmers' toil to the hungry markets of the world.

And where are those tens of thousands of harvesters from Eastern Canada, British Columbia, and the miner-harvesters from over the sea, which only a few days ago thronged our cities and larger town distributing centres? Scattered singly or in groups they have been swallowed up in the grain fields of Canada's prairie provinces. They have been merged into and become a part of the Epic of the West. They are working hard, but they are, too, catching a glimpse of a new life and it is inconceivable that they will fail to become imbued with some of the courage, the optimism, the vision of this great new land.

September days in Western Canada! Glorious days, health-giving, wealth-giving.

A New Wireless Wonder

Apparatus Supplies Heat Without
Apparent Direct Contact

The latest performances in which wireless is employed consist of supplying heat to bodies without establishing apparent direct contact between the heater and the heated body, and lighting lamps without any apparent electrical supply.

These are done by power obtained from a new short-wave vacuum tube. High frequencies are produced at

high power, using a short-wave length.

Foodstuffs have been enclosed in a glass tube and hung from the end of a metallic "aerial" that receives the transmitted power and conveys it to the food in the form of heat and cooks it.

New methods in electrical treatment are always being looked for by doctors. Perhaps, in the future, this new apparatus will be used for imparting heat to the body to produce artificial "fever," one of Nature's most prevalent factors in recovery from many diseases.

Explanation Is Simple

Exceedingly strange are the why's and wherefores of names. Take, for instance, the letter "Q"—how many of us have ever stopped to think or to ask ourselves why we call it "Q". And the answer is just as strangely curious as the question. The name of the letter "Q" is from the French word "queue" meaning "tail." "Q" is simply an "O" with a tail!

The prison population of England and Wales has decreased from 20,000 to 10,000 since 1878.

Foot Comfort

New Use For Radio Waves

Will Kill Germs Found In Milk, Says
Austrian Professor

Radio waves will kill germs found in milk, according to a report received by the medical college of the University of California from Dr. Karl Seidel of the University of Vienna.

Research done by the Austrian professor indicated that intense radio beams of very short wave length will kill germs without altering the milk molecules nor changing the natural flavor, the report says.

HAD NO APPETITE WEAK AND DIZZY

This New Brunswick Woman
Restored By Dr. Williams'
Pink Pills

Mrs. James Belyea, Brown's Flat, N.B., says:—"I am writing to tell you the great good I had through the timely use of Dr. Williams' Pink Pills. My health had failed and I was troubled with great weakness. I had no appetite and frequently had dizzy spells. The least exertion would make my heart palpitate violently and I felt tired at all times. I had doctored a great deal without getting much relief, and was feeling greatly discouraged when I finally decided to try Dr. Williams' Pink Pills. The happy results following the use of this medicine can best be summed up by saying that I am again perfectly well, able to do my housework and enjoy life once more. I feel it a duty to recommend Dr. Williams' Pink Pills to all weak people."

If you have any, or all, of the symptoms above noted, do not delay, begin treatment at once with Dr. Williams' Pink Pills. You will be surprised to note the improvement in your condition after a few weeks. You can get these pills through any dealer in medicine or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont. If you will send your name and address a little booklet, "Building Up the Blood," will be sent free.

Ex-Kaiser Recovers Farms

Former Kaiser Wilhelm of Germany, has won a suit for the recovery of two confiscated farms. The farms were seized by the Government of the Union of South Africa, in 1920. "The case is considered important as setting a possible precedent for actions to recover the former imperial estate in other countries, notably in Poland."

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Intelligent Congressman

Shipowner: We must have government aid! Congress does not realize how expensive it is to operate a ship. Why, barnacles alone cost American ships \$100,000,000 a year.

Congressman: You ought to cut that item down. Use a cheaper grade of barnacles, or get along with fewer of them.

When Asthma Comes do not despair. Turn at once to the help effective Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Turks Are Progressing

Dictator Kemal Pasha is compelling the Turks to abandon the Arabic alphabet and to learn the Latin alphabet. Turkey is more progressive than the Irish Free State with its compulsory Gaelic. While the Turk goes forward the Celt goes back.

It Has Many Qualities. The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

"Not by appointment do we meet delight and joy; they heed not our expectancy; But round some corner in the streets of life they on a sudden clasp us with a smile."

Milk May Be Sold In Sheets

Danish Farmer Has Invented Wonderful New Machine

The world is used to several varieties of prepared milk and to milk powder, but shortly it will be made, and sold, in sheets.

A landed proprietor at Copenhagen has invented a device which extracts the water from fresh milk and leaves dry milk which comes from the machine in a form resembling sheets of rather heavy tissue paper. In this form the milk, it is stated, can be kept for years, and becomes "fresh milk" again by mixing it with lukewarm water.

It is intended to build a factory to make this "sheet milk," which should be important to agriculture.

Locating Rome

An American mother and daughter had made an exhaustive tour of the Continent. When they returned to their "home town" somebody asked the mother if they had been to Rome.

"Say, Sadie," said the mother to the daughter, "did we go to Rome?" "Why, mothers," replied the daughter, "of course we did. Don't you remember that's where you bought the black silk stockings with the white clocks?"

Joseph Conrad, the novelist, could not speak English until he was 19.

There are 42,002 women employed underground in the mines of Japan at present, and new regulations provide that no more shall be so employed.

The hardest part about knowing some people is to conceal your opinion of them.

WRIGLEYS
The cool, comforting flavor of WRIGLEY'S Spearmint is a lasting pleasure. It cleanses the mouth after eating—gives a clean taste and sweet breath. It is refreshing and digestion aiding.

WRIGLEY'S

SAYS CANADA PROVED TO BE A REVELATION

Southampton, Eng.—"Canada is the best holiday country I ever struck," said Rt. Hon. J. Ramsay MacDonald, leader of the Labor Party in the House of Commons, on his arrival here after a visit to the Dominion.

In an interview he said he did not think immigration to Canada would "cure or even substantially alleviate our unemployment problem."

Discussing the British miner-harvester migration, Mr. MacDonald said:

"There is no doubt a very determined attempt is being made by certain people to spread discontent among the harvesters. It is my impression that a considerable number of the men will remain and get employment in Canada.

"From east to west in Canada the British worker is preferred to anybody else, providing he is prepared to do the work Canada requires him to do."

He expressed the opinion that the problem of winter work could easily be solved if some simple system of organization were brought into existence. Statements that Canada does not welcome British workers were untrue, he said.

"After more than twenty years absence from Canada," Mr. MacDonald remarked, "I hardly recognized places I had visited before. It was an absolute revelation and a good revelation to me.

"There is a vitality of expansion, a youthfulness and a hopefulness in Canada," said the former British premier. "Her weakness is that she has not got sufficient magnetic power to keep her people both Canadian born and British, immigrants within her own borders.

"The great magnet that is always pulling them is the U.S., and it is of the most vital interest to Canada to devise some means whereby she can accumulate sufficient magnetic power to hold her population within her domains."

New Branch Lines

Settlers In Saskatchewan Are Promised Railway Facilities After Long Wait

Winnipeg, Man.—Settlers of Saskatchewan who have waited in some cases for as long as twenty-five years for railway services are assured of these before the end of 1929, is the announcement from Western Headquarters of the C.P.R. made here.

In the south section of the province a line of eighteen miles will be completed easterly from Coronach, 37 miles westerly from Wood Mountain to the Consul branch of the C.P.R.

Another branch line 12 miles easterly from Coderre will give railway services to settlers of the Lake Johnston District.

Possibly the most important of the lines are those from Hutton, Atkins and Pennant. The Hutton extension north-easterly of about eighteen miles will tap the Fox Valley country at the west side, and the line from Pennant, 24 miles south-westerly, will tap it from the east side.

From Atkins, the first station east of Swift Current on the Main Line of the C.P.R., a branch approximately 20 miles long will be sent northward. This line will eventually connect Swift Current direct with Saskatoon.

In Central Saskatchewan the following lines are being projected:

From Foam Lake, south-westerly 27 miles.

From Rosetown to Perdue, 45 miles.

From Unwin, westerly 20 miles.

Northern Saskatchewan will benefit by the 10 miles north-easterly from Lloydminster.

Reject Marketing Board Plan

Sydney, Australia.—Wheat growers have rejected a scheme to form a marketing board to control the sale of wheat for the next three years. A ballot to decide what course should be taken on the matter resulted in 7,453 growers opposing the scheme, while 6,026 approved it.

W. N. U. 1752

Nations Must Agree On Naval Matters

Or Conference On Disarmament Would Be Useless Says Dr. Loudon

Geneva.—An early meeting of the League of Nations preparatory commission on disarmament would be useless unless an accord on naval matters is reached among the five leading sea powers, says Dr. Loudon, president of the commission.

Dr. Loudon, who is Dutch ambassador to France, suggested that the best way to meet this condition would be through a private conference at Paris of representatives of the United States, Great Britain, France, Italy and Japan. He said such a conference might readily reach an agreement on the points respecting naval matters which now divide them.

He said that unless a working basis could be found among these powers he would not take the responsibility of re-convening the preparatory commission except upon a direct mandate from the full assembly of the League.

Rules In Oratorical Contests Altered

Manitoba Trying To Reduce Interference With School Studies

Winnipeg, Man.—Alteration of rules for International oratorical contests, designed to reduce to the minimum interference with school studies, has been decided upon by the provincial central committee. Under the new rules, Manitoba will take part in the 1929 contest. The revised conditions are:

That the contest be open to students of grades 10, 11 and 12 only. Last year students of grade 9 were eligible.

Schools teaching any of the grades from 10 to 12 are to be asked to decide their respective champions by Christmas, by any method they determine, provided public speaking by a considerable number of the pupils is involved.

The preliminaries to the championship contest in Easter week are to be complete by the end of March. The district elimination contests are to be held before Christmas.

River Steamer Wrecked

Sinks After Hitting Huge Boulder In Peace River

Peace River.—The steamer D. A. Thomas, according to reports reaching here, is sunk 60 miles below here, broken in the middle by a huge boulder.

Since the palatial steamer left here September 10, loaded with freight for Vermilion Chutes and other way points, navigation has been carried on under the most trying circumstances, due to the extremely low stage of water. She was on her way upstream loaded with 60 head of cattle and several passengers when disaster overtook her. The cattle swam ashore and all aboard were rescued.

The steamer Thomas was built by the late Baron Rhondia in the summer of 1915, and was one of the finest on the island waters. The material for her construction was freighted in over the old Grouard trail by teams when the end of the steel was at Reno, and her cost was upwards of \$100,000.

Warns U.S. Gangsters

Toronto.—The Ontario Government, acting through the department of the attorney-general, will take immediate steps in an effort to see that United States gangsters do not commit acts of violence upon Canadian soil. Attorney-General Price has issued this warning to United States gunmen.

NOTED ENGLISH STATESMAN

The late Lord Haldane, Viscount of Cloan, noted English statesman, who died recently at the age of 72.

Loss From Damage Claims

Canadian and U.S. Railways Face Heavy Liability Each Year

Winnipeg.—Representatives of Canadian and United States Railways are meeting in Winnipeg to seek some method of reducing the enormous amount of damage claims paid for lost and damaged goods. Last year this amount totalled \$38,000,000.

A great deal has been done already as was reported at the meeting. In 1920 when the railways were first aroused and took definite action the figure was \$119,000,000. Since then reductions have been brought about each year. Shippers and receivers are co-operating better with the carriers and a great deal of education has been done among railway employees with a view to lessening rough handling and the other cause of loss. The American Railway Association employs three full-time special representatives to gather data on the subject and present it to the parties concerned.

Famine In Russia

850,000 Persons Will Be Fed Through Public Funds

Khar'kov, Ukraine, Soviet Russia.—Eight hundred and fifty thousand persons will be fed through public funds during the coming winter in the Ukraine, the grain crop having fallen far below the need of the population. Ordinarily the Ukraine is one of Russia's best granaries and in good years has wheat both to eat and to export.

The Moscow government has appropriated 31,000,000 rubles, the Ukrainian government 10,000,000 rubles and social service organizations have begun a campaign to raise an additional 6,000,000 rubles to provide nourishment this winter for the stricken population. One-third of the Moscow advance is a gift and the balance is a loan.

Trail Riding Popular

Banff, Alta.—Trail riding in the Canadian Rockies is increasing in popularity. In 1925 Pat Brewster had five parties on the trail. In 1926 there were 19 who took this form of pleasure as the only way in which to see the full beauty of the Rockies. Last year the number was augmented to 41, and this year it will run to about 85.

Letter Carriers' Demands

Windsor.—A boost in maximum salaries from \$1,500 a year to \$2,100, a seven-hour day and a five-day week comprise the main demands to be made by the Canadian letter carriers of the government as formulated by the delegates to the biennial convention of the Federated Association of Letter Carriers of Canada.

New Northern Route Is Complete Success

Was Opened By Blasting Of Montreal River Channel

The Pas, Man.—Saskatchewan's new route into the mineralized country of the far north, made available by the federal government blasting rocks out of the Montreal River in North Central Saskatchewan, is a complete success.

Hon. Thomas C. Davis, attorney-general of Saskatchewan, and Frederick MacDermid, K.C., of Saskatoon, accompanied by their wives, left Prince Albert on September 5, to make the swing around the great water half circle in the northern part of the province.

The voyage ended Tuesday afternoon, September 18, at The Pas, and was a complete success in every way, only 14 days being required for the entire trip.

That the distinguished travellers were accompanied by their wives proves conclusively the ease with which the new passage can be made.

Northcott Is Apprehended

Youth Wanted On Murder Charge, Is Arrested In B.C.

Vancouver.—Gordon Stewart Northcott, wanted by the Riverside, California, authorities on a murder charge in connection with the alleged slaying of several youths on a chicken ranch, and for whom the entire Canadian West has been searched for four days, was arrested at Okanagan Landing, five miles south of Vernon, by provincial police Constable Morley Green, according to information telegraphed to Inspector Forbes Cruikshank, in charge of the Vancouver District.

The arrested youth, according to the police, did not deny his identity nor did he actually admit it. The police are certain, however, that he is the much-sought man for whom a country-wide search has been in progress for several days.

New Branch Line Opened

First Train From Melfort North Makes Journey Over C.P.R.

Melfort, Sask.—The opening of the new branch from Melfort north on the C.P.R. created considerable excitement and loud cheering when the first passenger train made its journey to the end of the steel at Edenbridge. Crowds of people greeted the "iron horse" which was quite reminiscent of the days gone by when the first trains made their journey across the western prairies.

Every station platform along the way was jammed with people who were present to greet the first train to traverse the distance between Melfort and Edenbridge over the new C.P.R. branch line. With shouts and cheers they hailed its coming, thinking, no doubt, of the benefit to be received in being linked with the outside world.

Eligible For League Posts

Geneva.—Women's rights have won still another victory. Henceforth appointments on the government boards of all international institutions which are linked with the League of Nations will be made without distinction of sex and women are now assured representation. A resolution to this effect was given unanimous approval by delegates at the league assembly. It was introduced by Dame Edith Lytton, of Great Britain.

Form New Association

Ottawa.—A new organization of postal employees, to be known as the "United Postal Employees of Canada" was launched here by the fifteenth annual convention of the Dominion Postal Clerks' Association.

DEATH TOLL IN STORM AREA MOUNTS HIGH

Washington.—With death reports to the American Red Cross from the tropical hurricane area—Guadeloupe, Porto Rico, the Virgin Islands and Florida—reaching 1,199, the relief plans were rushed to combat the possibility of disease and pestilence following in the wake of the storm.

Hundreds of injured are to be treated, thousands fed and additional thousands given shelter from the elements. To this end the Red Cross is directing its gigantic relief machine.

Figures reaching the Red Cross place the dead as follows: Guadeloupe, 660; Porto Rico, 106; Florida, 427; Virgin Islands, 6.

Estimates of injured run into the thousands. Property damage is estimated at exceeding \$150,000,000. Tens of thousands are without homes.

The chief concern of the Red Cross and local relief agencies is now centered in maintaining sanitary conditions in the area ravaged by the hurricane.

Plans were rushed to establish two camps in Palm Beach to care for refugees where they can obtain treatment for disease. Sanitary conditions in the interior of Palm Beach county were reported bad.

Governor-General Waldo Evans of the Virgin Islands, notified Red Cross headquarters that health conditions were bad but there was not immediate danger of an epidemic. United States Consul William H. Hunt, reported from Guadeloupe in the French West Indies that disease in epidemic form is feared.

Evans and Hunt both appealed for Red Cross aid in the emergency.

Henry M. Baker, National relief director for the Red Cross, arrived in Porto Rico and radioed to headquarters here that while there was no immediate danger of epidemic there, he said conditions were bad and food and clothing needed.

Looks For Better Prices

United States Farmers Are Urged To Hang On To Their Crops

Washington, D.C.—Secretary Jardine asserted in a statement released through the Republican national committee that "if Governor Smith is elected and tariff rates are reduced to the schedules of the Underwood Act, as Governor Smith forecast in his acceptance speech, the entire farm industry will be thrown into a state of utter demoralization."

He reiterated his views that wheat farmers should hang on to their crops. He said that the present price level is lower than justified, and that everything pointed to an increase.

Noting prospects of increases in this country's wheat crop, and the forecast for the biggest Canadian crop in history, he said, however, that from a world point of view the situation is about the same as last year. Shortage of rye abroad and growth of world population, he asserted, would increase foreign demand.

Plot To Kill Trotzky

Several Attempts Are Made To Assassinate Exile In Siberia

London, Eng.—The London Daily Mail says that despatches received in London revealed several attempts to assassinate Leon Trotzky, since his exile to Siberia by the Soviet government.

According to the reports, Trotzky had written letters to Christian Rakovsky, former Soviet envoy to Great Britain, describing how his cottage was besieged and how sharpshooters attacked him from trees.

Trotzky said he and his son defended their house with two sporting guns and told how the attack was repeated three successive nights.

After the failure of the sharpshooters, local authorities denied food to the Trotzky family, the latter were purported to have said. Only the kindness of friends saved them from starving.

In the regular "shopping list" of the London Zoo appear large quantities of sunflower seeds, mealworms, condensed milk and dried flies.

THIS FALL IN DIDSBURY STORES

Didsbury merchants are much ahead of the average in cities of this size in announcing a regular fall opening in the manner in which they have chosen and on the scale which they have adopted as the best method. The fall and winter season, replete with its merchandising opportunities, is often ushered in gradually without announcement, with no inducements other than those ordinarily found peculiar to the community.

But not so here. This issue of the Pioneer is teeming with special buying offers made at a time when buying is most necessary and representing most of those items which every family is forced to acquire at this particular time of year. And not only are the items seasonable and other attractions overbalancing to a foreign competitor, but the great trade event of the year, the annual gift campaign, is opening. This in itself is not an ordinary feature—it is made extraordinary by its relation to the community and the eagerness with which the people as well as the tradesmen look forward to it.

So, the fall season is here in spirit as well as in fact. It is opened by mercantile offerings that may not have equals during the remainder of the year. The "sadddest of the year" time for shoppers may have a different aspect. And Didsbury is given an opportunity from today forth to choose seasonable merchandise from stocks that qualify as to quantity and high standard. It is your opportunity to profit as well as that of your business friend. And it is your duty, other things being equal, to give your home merchant that which he has every right to expect. Start the fall season with him.

THAT VACATION

Well, you are home again from your vacation. Or, if you have had no vacation, at least you have been out in the open on numerous occasions. How did the experience strike you?

Did you find yourself in a class with those people who never ask the why of anything, but simply accept the marvels they see and give them no second thought? There are many like that. They have eyes to see, but they see not; minds to reason with, but they think not.

Or were you one with those who see and hear and reason, but who sum up the whole matter by saying that this world, and all there is in it, has come about by chance or accident? No design, no intelligent purpose, but just a happy coming together of favorable circumstances, and here we are!

Or were you among those whose answer to the great riddle of the universe is a Creator? In your heart then, is written the truth, old 4,000 years ago yet ever new—"The sea is His and He made it, and His hands prepared the dry land."

If you are in this latter class you have made the most of that vacation. That is the spirit in which one should approach the wonder world one lives in. That is the inevitable conclusion one should reach after coming back.

Maybe your vacation did not inspire thoughts like these. But you will admit, if you look back over it, that the failure was not in the experience of that tour, or that stay by the sea or in the mountains, but in yourself.

LOCAL & GENERAL

Miss Laura Smith was a Calgary visitor over the week-end.

Mr. Edgar Clemens of Calgary was a visitor in town this week.

Mr. E. G. Ranton was a business visitor to Calgary on Tuesday.

Messrs. Clemens and Kaufman were business visitors to Calgary on Monday.

Clara Bow in "Ladies of the Mob," at the Movies, Didsbury, Wednesday, October 3rd.

Dr. Clarke returned from Edmonton on Tuesday where he was attending the Medical convention.

Mr. Geo. Lowe of the Royal Bank staff was a Calgary visitor over the week-end.

Don't forget to see "Wings" here on Saturday, October 6th. Complete sound effects.

Rev. A. E. Hayes is attending the fall meeting of the Presbytery this week at Innisfail.

At the movies Saturday, Sept. 29, Tom Mix in "Outlaws of Red River." This is the one you missed when the lights went out!

A. J. Allen returned on Tuesday to his duties in the Royal Bank following a two weeks vacation at points in B. C. and Alberta.

The World's baseball series starts on Thursday, October 4. Hear them over the radio at Johnson & McCloy's barber shop.

Snell & Carter, Registered Optometrists, Red Deer, will be in their office over the Royal Bank, on Monday, October 8th. 40-2

A dance will be held in the Didsbury Opera House, Friday, Oct. 12. Carstairs Orchestra. Keep this date in mind.

Lone Pine Hall, Thursday, Oct. 4, "Student Prince," featuring Norma Shearer and Ramon Navarro, the Star of Ben Hur.

Reta Fleury wishes to announce that she will prepare pupils for piano examinations in either Toronto Conservatory or Royal Academy. 39-2

The Wednesday half holidays end this month. Beginning October stores will remain open all the week, but there is an agitation among the business men to have the half holiday run throughout the year.

Among those who journeyed to Calgary on Monday and Tuesday evening to hear Geo. Robey, the great English comedian, were Mr. and Mrs. H. Morgan, N. Lammle, C. E. Reiber, Mr. and Mrs. W. A. Austin, J. H. Lowrie and H. W. Chambers.

The monthly meeting of the Young People's branch of the W.C.T.U. will be held at the home of Mrs. Hillyard, Tuesday evening, October 2nd, at 8 o'clock. The topic "Beautiful Girlhood" will be of great interest to all girls. Mrs. C. J. Hallman will be the chief speaker.

Handy scratch pads at the Pioneer Office, 3 for 5 cents.

THE O. S. A.

With over two hundred applications on file at present, a large enrollment is pretty well assured for this year. There is still accommodation available and applications will be accepted as long as it lasts.

Not many years ago special agricultural education was considered unpractical and unnecessary; today statistics show that those farmers who are above the average in training are appreciably more successful than the untrained men. The heavy average attendance at the O.S.A. indicates that many citizens in Alberta appreciate this fact.

The purpose of the Olds School of Agriculture, which opens its doors to classes for the fifteenth time on October 30th of this year, is to give to farmers and their sons that special instruction that will fit them to cope successfully with the difficulties of modern farming, and to give to farm girls such training as will make them efficient homemakers. As well as practically fitting students for farm life, the course also serves as preparation for further study leading to degrees in Agriculture or Domestic Science in the Provincial University.

These courses are especially adapted to the needs of the farm boy or girl who is or has been unable to gain a good education and who cannot afford time or money to go through high school to university. No special entrance standard is maintained, it being simply required that boys or girls have sufficient elementary education to understand and profit by the work taken.

The School is maintained by the Provincial Government and as a result there are no tuition fees, both courses are free, consequently the five months can be spent at the School for a surprisingly small outlay. Board, books, and a small deposit, to cover possible breakages of equipment, are all the necessary items of expense. Students are accommodated in modern dormitories under supervision of the teachers, for the sum of \$1 per day for board and room.

The School is well equipped, efficiently staffed and in a position to give instruction in elementary academic subjects as English and Mathematics so necessary to the average farm man or woman—and in practical work such as Field Husbandry, Livestock, Poultry, Farm Mechanics, Farm Management, Agricultural Chemistry, etc.

Only Hotpoint has the Hot Point Heating Element

THE famous Hot Point Heating Element is the very life of the Hotpoint Iron. It ensures the quick, even heat which renders ironing easy. It maintains a hot point which keeps the iron gliding smoothly over the clothes, without sticking or rucking. It is built to give extra long and faithful service.

Only the Hotpoint Electric Iron has this heating element. Only the Hotpoint Iron can give you Hotpoint results.

A Double Escape

DOCTOR'S DAUGHTER'S STORY

Another Toronto home provides evidence of how a simple cut, scratch or bruise, may pave the way to deadly blood-poison, and how vital is the need for keeping Zam-Buk, always handy?

When called upon at 3, Business Avenue, Mrs. J. E. Zealley, daughter of the late Dr. Bevan, of St. David's, S. Wales, said:—"My boy Alfred scratched his leg with the brass tag of a shoe lace. A nasty poisoned sore developed and it defied all the usual ointments. Hearing splendid reports about Zam-Buk I decided to give it a trial. To my great relief, the balm soon caused healing to set in. All inflammation and poisonous matter was quickly removed by Zam-Buk, and it healed the sore without leaving a scar."

"Again when I fell over a steel fender and injured my knee badly, Zam-Buk alone saved me. My daughter, a nurse, was of the opinion that only an operation could remove the mass of inflammation and pus. But I again pinned my faith to Zam-Buk, and it cleansed and healed the wound." All druggists and stores sell Zam-Buk at fifty cents per box. Equally valuable for eczema, pimples, cuts, burns, etc.

WORLD HAPPENINGS BRIEFLY TOLD

Thomas Loudon, one-time Canadian sculling champion, died recently in Toronto, at the age of 87.

The first windmill plane has crossed the English Channel, piloted by its inventor, J. De La Cleva.

A Chinese laundry man and the employees of a millinery shop at Mexico City, divided the first prize of \$400,000, in the September 14th lottery. They held number 1246 which was winner.

Permanent government flying posts in Hudson Strait are a strong possibility it was stated by Squadron Leader T. A. Lawrence, who with eight others, has returned from 16 months' service in the North.

Members of the provincial government and Lord Lovat, under secretary of state for the Dominions in the British Government, discussed the placing of British settlers on the land in British Columbia. The government offered the filiest co-operation.

French Canadians, resident of New England, may decide the presidential election. Ordinarily these states are Republican but it is thought Democrats will get the majority of the French-Canadian vote which is considerable.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

About two-thirds of all the employees in the telephone business in the United States and Canada are women and girls.

One medical authority says that the growth of children takes place entirely when they are asleep.

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word genuine printed in red? It isn't the genuine Aspirin without it! A drug-store always has Bayer, with the proven directions tucked in every box:

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

W. N. U. 1752

LARGEST AND FINEST OIL TANKERS SAIL UNDER CANADIAN ENSIGN

ABOVE—The "C. O. Stillman" world's largest Tanker. BELOW—The "Calgarolite" most modern of Tank ships.

With the launching in England on September 14th of the motor tank ship "Calgarolite" Canadian interests which already own and operate the world's largest tank ship, claim also the most modern and efficient of tankers, and a Canadian tanker fleet wins further eminence as one of the major oil fleets of the world.

The "Calgarolite" slipped from the ways at Haverton Hill-on-Tees with Miss Eleanor Ross, daughter of Victor Ross, Vice-President of Imperial Oil Limited, acting as sponsor. The "Calgarolite" is a 15,600 ton vessel with an indicated horsepower of 6,500, which makes her one of the most powerful and fastest tankers of her size. She is guaranteed a service speed of 12 knots. She is 540 feet long with a 70-foot beam and moulded depth of 37 feet 9 inches. Her modern equipment will permit loading and unloading of 120,000 barrels of oil in twenty-four hours, and so she will be almost continuously in transit, serving much as an "oil ferry" between Talara in Peru, Cartagena in Colombia, and Montreal and Halifax. She will establish new figures for economical transport of petroleum.

The "Calgarolite" is the last of three large modern sea-going tankers and one lake tanker which were laid down some time ago in British shipyards for Imperial Oil. Preceding her in launching were the "Windolite" for lake service and the "Victrolite" and "Vancolite." The flagship of the fleet in which she will serve is the world's largest tanker, the "C. O. Stillman."

The three sea-going ships just built in the British yards replace three Imperial vessels which went to the bottom at the hands of the enemy while transporting petroleum for the allied cause. They were the "Luz Blanca," the "Retlaw" and the "Palatine."

The motor driven tanker of today is a highly specialized vessel which is designed to move a great volume of petroleum at maximum speed and with minimum delay at loading and unloading ports. A few years ago three days was considered a quick "turnaround" for a tanker. Today, with modern pumping equipment, a tank ship turns around in twenty-four hours. That is to say, twenty-four hours after she arrives in port she has taken on or discharged her cargo and is again at sea. Consequently the modern tanker is moving practically all the time and, more than any other type ship, is the actual home of her crew. To compensate for the more continuous service, the crew is accommodated in a style that would turn the average tar green with envy. Nothing is overlooked to provide complete comfort and the sailors enjoy quarters and cuisine that compare favorably with passenger accommodation on many liners.

The Imperial Oil fleet now comprises nine large ocean-going motor tank ships: the "C. O. Stillman" of 22,175 tons, the "Victrolite," "Vancolite," "Calgarolite," "Montrolite" and "Canadallite" of 15,600 tons; the "Ontariolite" and the "Reginolite"

of 12,000 tons, and the "Trontolite," formerly a steam turbine vessel, which was converted into a motor ship, with a tonnage of 9,150. The combined motor tank ships carry 1,016,000 barrels of oil which they load and discharge at an average port time of twenty-four hours. It is estimated that these ships carry for about 25 per cent. cheaper than steamships of corresponding size.

In addition to the ocean tankers, Imperial Oil is operating six canal size steam driven ships on the Great Lakes. These move refined products from Halifax to various ports in the Great Lakes and to Fort William, serving the Halifax, Montreal and Sarnia refineries. Most of these vessels tie up during the winter but in the summer it is a rare thing for one of them to have more than eight or ten hours in port. On the Pacific Coast the SS "Imperial" and two other steam vessels transport petroleum products for the company, and there is also the small motor ship, the "Marvolite," with a capacity of about 1,000 barrels. The combined capacity of the entire Imperial fleet is approximately 1,100,000 barrels; sufficient to fully load more than 5,300 tank cars, making a train 36 miles long.

The modern ocean-going tank ship contrasts interestingly with the shallow draft river boats which are used by the Imperial interests on the Magdalena River, in Colombia, and which resemble in appearance the old stern wheelers Mark Twain once piloted on the Mississippi.

their knowledge, they can hardly expect to be secure from the temptation to bow before creatures of like passions with themselves, whether they be cunning adventurers or heartless tyrants.—The Christian.

"The supernatural is the native air of Christianity, its cradle-song is that of angels, its death-chant the triumphant exclamation, 'Behold, I see the heavens opened.'"

We are daily judging ourselves unworthy of divine grace in every act of refusal to accept and rely on it.—Lyman Abbott.

"There stood a man of Belgium saying, 'Come over and help us,' and immediately men of Britain arose to answer the call."

We cannot think of the vastness of the universe without feeling that we are citizens of no mean city, but perhaps we should be more impressed by the order and the uniformity of the heavens.—J. Arthur Thomson.

"When came the Sabbath of worship and rest, Out of the city, in reverent quest, Down by the riverside faithful ones came, Where prayer was wont to be made In His name."

The world has often had its dreams of gods who had come down in the likeness of men, and even of a divine influence pervading all things; but no ethnic religion has told how men may come to God.—H. E. Fox.

"The talk of Lenin was overbearing and belligerent as he breathed out threatnings and slaughter on the road to Genoa."

"What is all this solar energy compared to that boundless supply of divine grace—always available to the believing heart! Therein lies power to turn the world upside down, if only the people of God would receive and transmit what he is so willing to bestow!—The Christian.

Life is like a race. Speed up and you cover more ground, but you get to the end more quickly.

Record Cheese Shipment

Canadian cheese shipped from Montreal in a single week to foreign markets totaled more than 55,000 boxes, an increase of nearly 20,000 boxes compared with the same week a year ago. Prices paid at country points were records for the year to date.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

It is said man can now fly five times as fast as a bird. Maybe so, but you hardly ever hear of a bird coming down out of control.

No man can cut a wide swath who always has an axe to grind.

BABY GIRL HAD DIARRHEA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes:—"Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhea. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Haven't you any

why, I wouldn't be without it where there are children."

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhea and was running around as well as ever."

CHAPTER I.—Continued

Gillis rose with an embarrassed air. "Here I am talkin' 'bout you and I travellin' together. I guess you're one of them tourist fellers, and I don't suppose you want to go along with a rough-neck like me."

Donald liked this big, bluff Westerner, with his honest face and simple manner. He reached in his pocket and took out the money the sheriff had given him.

"You see that? Well, before this money is gone I'll have to find a job. And it's borrowed money, too."

Gillis studied him carefully. "Well, you got my goat in a way, but there is one thing I do know, and that is that you ain't no slicker. I'm 'bout twice your age, and I know a good face when I see it. I'll meet you tomorrow mornin' at the station. I'm goin' to start callin' you Donald right now. And what's more, Jack Gillis is your friend from now until hell freezes over. Good-night, Donald."

CHAPTER II.

Two days later Donald and the Westerner boarded a C.P.R. train in Montreal for the West. They were no sooner comfortably seated in their section of a tourist sleeper than they began rushing westward through the winter evening.

The days that followed were full of interest to Donald. The train roared West, running on time like a clock. They tore through towns and farming settlements and plunged into forests and hills in the northern part of Ontario. The hills dwindled when they reached Manitoba, and in Alberta Donald felt as if he were sailing over a vast sea of land.

"We'll see them old Rocky Mount'ns pretty soon," said Gillis happily. "You'll like B.C. Donald. And after you bin there awhile all hell won't pry you loose. I know, 'cause I broke away from her twice, but I always drift back. I ain't got the eddication to tell you the funny feelin' I have when I'm comin' back to her. When I see them big mount'ns

loomin' up I feel sort of scrumptious inside, like I wanted to smile at everybody, and I have a hard time to keep from lettin' out a yell."

"Your power of expression needs no apology," laughed Donald.

"Forgot to tell you that I ain't goin' right through to the Coast. The Company I work for has a mill at Revelstoke that needs fixin' up. The job'll probably last 'till spring. You better stay off with me, 'cause you'll find things on the Coast pretty quiet this winter."

Gillis had played the part of host from the start, and Donald knew that if he accepted the invitation to stop off at the interior town, Gillis would insist on treating him as a guest. He felt that his new friend could not afford to practise this lavish generosity.

Donald shook his head regretfully. "I think I'll go through to Vancouver."

Gillis arose with visible reluctance as the train drew into Revelstoke. "Well, I got to leave you, pardner."

Donald had developed a sincere friendship for the man. There was a great deal of tenderness beneath the rough exterior of this Western logger.

"I'm pretty lucky in finding a friend like you," Donald said feelingly as they shook hands.

"That's all right, my boy," Gillis replied awkwardly. "I like you, and I'll sure look you up when I hit the Coast. So long."

The sun was shining brightly as the train rushed along the edge of Burrard Inlet toward Vancouver. The lawns were a bright green, and the breeze blowing in the car-window was soft and balmy. Across the Inlet, that sparkled in the sunlight, were huge mountain-peaks, their tops covered with snow. The homecoming passengers were smiling happily, while a look of eager interest shone on the faces of those who were strangers to the Coast.

Donald paused for a moment on the corner of Granville Street while the cosmopolitan crowd flowed past him. Stolid-faced klotchmen, dressed in flamboyant colours, with baskets of clams on their backs, rubbed shoulders with the haughty, turbaned Hindu. The little brown-faced Jap darted here and there amongst the crowd. A Chinaman came swiftly around the corner of an alley, moving with a peculiar trot, a pole across his shoulders, from each end of which dangled a basket filled with fish and vegetables. Another Chinaman, with a face of true Oriental impassiveness, riding a bicycle down the street, a clay pipe jutting from his mouth, was extremely incongruous. The wide, well-paved streets and the city's general air of modernity were impressive. In common with many other Easterners, Donald had pictured Vancouver as a rough Western town.

Donald engaged an inexpensive room and at once began a search for employment. Many of the mining and logging camps were closed for the winter, and work was scarce. He applied to all the engineering firms in the city, but their answers were invariably the same: "Nothing doing until spring."

Days passed, and as late winter merged into spring there was a stir throughout the city. Men who had spent the winter in idleness were "going out" again. Loggers in their characteristic blanket shirts hanging loose outside their trousers, could be seen on all sides saying good-bye to their friends.

One morning Donald counted his rapidly dwindling cash and found

that he would have barely enough to tide him over the week-end.

With all his assets in the way of clothes and jewelry in a pawnshop, he could not stave off the inevitable, and there came a day when he had not even the price of a meal. Too proud to ask for a loan, he went without breakfast and lunch.

At the logger's employment agency he was told the same old story: "Only men of experience wanted. But," the agent added hopefully, "men are going to be scarce this summer, and they will be taking on everything before long." Donald made the rounds of the engineering firms where he had applied for a position, but without success. Force of habit led him back to the employment agency, where he sank disconsolately to a bench.

A diminutive man with blond hair, bright blue eyes under shaggy brows, and his head set at a cocky angle, entered briskly and approached the wicket. "S'y, do you know where I can find an 'eavy-weight that can box a bit?" he said to the agent.

"How about those two I sent you yesterday, Andy?"

The one addressed as Andy made a gesture of disgust. "Those two blighters were as 'eavy as cows. They didn't know their right 'and from their left. I don't want any 'uman punchin' bags, I want a man that 'as a little speed. Blime me, if I was in Austrylia I could get a 'arf a dozen in 'arf a minute."

"I'm your man," said Donald stepping forward.

The small man turned. The keen eyes under the bushy, light-coloured eyebrows studied Donald carefully. "Can you box?"

"I can."

"Good! Come with me."

Donald followed the sturdy little Australian. For a few blocks they walked in silence.

"Ad your dinner?" queried the Australian.

"No."

"We'll 'ave a bite in 'ere."

They turned into "Old Joe's" restaurant.

"Sounds good to me," observed Donald with a pleased smile.

"Been missin' a few meals, 'ave you? Order what you want," said the Australian, as they sat down to a table.

"I'll warn you that I'm hungry," cautioned Donald.

"Op to it, my lad; about all we get in this blinkin' world is what we eat. What's your name?"

"Donald McLean."

"Mine's Andy Pettray."

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria. At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Then Andy delivered himself of the following information: "I'm the manager of Bill Hagin, the Austrylan 'eavyweight. We are to fight Slugger Garrieau, The Canadian champion, in about two weeks. The Slugger is well named, as 'e is an 'eavy 'litter and it tykes a good boxer to beat 'im. I want an 'eavy man that can speed Bill up a bit, and I've 'unted this town over, but I can't find one. Now, if you can deliver the goods, you will be worth three dollars a day and your eats. What do you s'y?"

"I say 'yes,'" was the decided answer.

Andy dug into his pocket. "Ere's three dollars to bind the bargain."

"Better wait until I earn it," suggested Donald.

"That's all right, me lad; you'll be needin' it to eat on. I ain't worryin'."

"Come to the gymnasium at the corner of Robson and Granville at two o'clock tomorrow," advised Andy as they stepped outside.

"I'll be there, and I want to thank you for your kindness."

"Forget it," smiled Andy. "I've been flat many a time myself."

"Half an hour ago I was broke and hungry," mused Donald, "and now I am well fed and have three dollars in my pocket. Great old world this." He chuckled happily as he swung down sun-splashed Cordova Street with a buoyant stride.

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

TOOTH STRUCTURE

You examine the highly polished clean tooth surface and you conclude, and rightly so, that the enamel does not persist all the way through. As the bark is to the tree, so the enamel is to the tooth, its protective covering, but serving as well, the purpose of ornamentation of the tooth body.

In the tooth, this body which constitutes the main bulk of the tooth, is known as the dentine.

Then is this all? No, for as in the tree we have a pith or core, so in the tooth we find a central chamber known in the crown of the tooth, as the pulp chamber, and in the root, as the root canal.

But you have observed, too, that the enamel covers only the exposed portion of the tooth, or crown. The root, then, is protected by a covering known as cementum, which attached the myriads of fibre or "lifelines," that hold the tooth firmly in place in its socket.

Nature, ever wise, has constituted the enamel the hardest substance in the human body, to better withstand the stress to which it is subjected. Also, enamel does not undergo the physiologic changes of dissolution and repair to the extent of any other body tissues, hence the need of hardness as an effective barrier to injury and disease.

In the dentine are minute tubules, or canals, containing soft tissue filaments through which communication is established from the outside of the tooth to the nerve tissue of the pulp; and because of this honeycombed structure and, too, owing to dentine being softer than enamel, it is less resistant to disease than is the latter.

So you can see how important it is to keep intact the enamel which constitutes the outer defences of the tooth since disease processes, once penetrating the enamel barrier, can quickly gain access to the more vital tissues within and there proceed apace to work disaster.

German youths are not so tall now as in the pre-war days. The general decrease is about 1½ inches.

Little Helps For This Week

"And the Lord make you to increase and abound in love one toward another, and toward all men." — 1 Thessalonians iii. 12.

If any little word of mine
May make a life the brighter,
If any little song of mine
May make a heart the lighter,
God help me speak the little word,
And take my bit of singing,
And drop it in some lonely vale
To set the echoes ringing.

If any little love of mine
May make a life the sweeter,
If any little care of mine
May make a friend's the fleetier,
If any lift of mine may ease
The burden of another,
God give me love and care and strength
To help my toiling brother.
God divided man into men that they might help each other.—Seneca.

Bears Well Behaved

Have Better Manners Than Any Other Wild Animal

The epicurean bears have the best table manners of any wild animal, in the opinion of Scorehum Alarid, who presides at the nightly feasts served to bruins in the park at Yosemite, Cal.

Scraps of food gathered from eating houses of the region are brought to a regular place, where bears are always waiting to be fed.

"Each evening the hungry bruins patiently wait until I have backed my truck containing their food to the platform and have set their table," Alarid said.

"When I empty the scraps on the platform they take their places. They do not guzzle their food and are not in the least disturbed by the thousands of tourists who watch them," he added.

Airplane Saved Men

A score of men without food and very little clothing, in a wild part of the Red Lake District, Manitoba, have been saved by airplane, which took emergency rations from Hudson. The plight of the men was caused by a forest fire which destroyed their cabins and supplies.

The principal difference between a "shoppe" and a "shop" is about ten bucks per garment.

Don't forget it, that self-pity is the most despicable of all vices.

Pimples Itched And Burned Badly Cuticura Healed

"Pimples broke out on my nose and spread all over my face and body. They were hard, large and red, and festered and scaled over. The pimples itched and burned so badly that I scratched, and scratching caused many eruptions. They were so painful that I could not sleep, and used to cry from the pain. The trouble lasted two years."

"I purchased some Cuticura Soap and Ointment and after using them two days I found they were helping me. I continued the treatment and after using four cakes of Cuticura Soap and three boxes of Cuticura Ointment I was healed." (Signed) Miss Lucy Kinakin, Verigin, Sask.

Make Cuticura Soap and Ointment your every-day toilet preparations and have a clear, sweet skin, soft, smooth hands, and a healthy scalp with good hair. Cuticura Talcum is unexcelled in purity.

Sample Each Free by Mail. Address Canadian Depot: "Glenhouse, Ltd., Montreal." Price, Soap 5c, Ointment 25c and 50c, Talcum 25c. Cuticura Shaving Stick 25c.

GOOD ADVICE FROM MOTHER OF SEVEN

Recommends Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I began taking Vegetable Compound for nerves and other troubles and I must say I felt different after the first dose. I have been told this last six months that I look twenty-five, although I am now forty-seven and have had seven children. I have taken the Vegetable Compound regularly for some time and sleep well, rise early and feel young."—MRS. MCKEE, 18 Laurier Ave., Toronto, Ontario.

Public Notice

MUNICIPAL DISTRICT OF WESTERDALE NO. 311.

Considerable damage has been caused
to bridges and culverts within the Muni-
cipal District of Westerdale No. 311, by
traction engines, and especially when
used with spades attached to the wheels.

Notice is therefore given that in future
By-Law No. 31 will be enforced. The
following is a synopsis:

No person shall run any portable en-
gine over any culvert or bridge on any
highway in the Municipal District of
Westerdale No. 311 unless and until such
person shall strengthen and protect, at
his own expense, such culvert or bridge
by laying down three inch plank at least
twelve inches wide under the wheels of
such engine, so as to distribute the weight
and protect such culvert or bridge from
any damage resulting from such engine
being run across or over same.

Any person convicted of a breach of
this By-Law shall be liable on a summary
conviction to a fine of not more than ten
dollars for each such offence, and in ad-
dition for damages to the extent of the
damage caused to any such culvert or
bridge by reason of such infraction.

EDMONTON, ALBERTA

NOXIOUS WEEDS NOTICE

Noxious weeds from mature plants are spread by the wind.
Hand pull and burn all such plants. Burn any ripe blossoms
of Sow Thistle and Canada Thistle that you may find.

Require all threshing machines, combines, wagons and racks
used at the time of threshing, to be thoroughly cleaned before
moving on to your farm or leaving it.

Gather and burn all weed seeds left on the ground after thresh-
ing. See that your summerfallow goes into the winter "black."

**Attend to this or much of the good work
that has been done in weed control and
eradication will be undone.**

Your co-operation in the campaign for a "weed free province"
is solicited.

Register all threshing machines and combines with the Depart-
ment of Agriculture.

W. J. STEPHEN, Field Crops Commissioner

Buy Coal-Now!

During the winter months there is often a shortage of High
Grade Coal and deliveries are limited.

Stock up in the Autumn—You can get just the kind you want,
from a choice of Quality Coals to meet your requirements—
and your individual order will receive careful service.
We recommend according to your needs.
